

frame rename — Rename existing frame

[Description](#)[Menu](#)[Syntax](#)[Remarks and examples](#)[Also see](#)

Description

`frame rename` changes the name of an existing frame. You can even rename the current frame.

Menu

Data > Frames Manager

Syntax

```
frame rename oldframename newframename
```

Remarks and examples

[stata.com](#)

oldframename must be an existing frame. It may be the current frame. *newframename* must not be an existing frame.

▶ Example 1

Let's assume we have several frames in memory, including a frame named `default`. We see this by typing `frames dir`:

```
. frames dir
cars      74 x 12; 1978 automobile data
default   50 x 13; 1980 Census data by state
work      28534 x 21; National Longitudinal Survey of Young Women, 14-24
           years old in 1968
```

We want to rename the `default` frame to a new frame named `census`:

```
. frame rename default census
```

We also want to rename the existing frame `cars` to `automobiles`:

```
. frame rename cars automobiles
```

We can then check the changes with `frames dir`:

```
. frames dir
automobiles 74 x 12; 1978 automobile data
census      50 x 13; 1980 Census data by state
work        28534 x 21; National Longitudinal Survey of Young Women, 14-24
           years old in 1968
```
