fmm: truncreg — Finite mixtures of truncated linear regression models

Description

`fmm: truncreg` fits mixtures of truncated linear regression models; see [FMM] **fmm** and [R] **truncreg** for details.

Quick start

Mixture of two truncated normal distributions of `y` with truncation from below at 0

```
fmm 2: truncreg y, ll(0)
```

Mixture of two truncated regression models of `y` on `x1` and `x2` with truncation from below at 0

```
fmm 2: truncreg y x1 x2, ll(0)
```

Same as above, but where `lower` is a variable containing the truncation point for each observation

```
fmm 2: truncreg y x1 x2, ll(lower)
```

With class probabilities depending on `z1` and `z2`

```
fmm 2, lcprob(z1 z2): truncreg y x1 x2, ll(0)
```

With robust standard errors

```
fmm 2, vce(robust): truncreg y x1 x2, ll(0)
```

Constrain coefficients on `x1` and `x2` to be equal across classes

```
fmm 2, lcinvariant(coef): truncreg y x1 x2, ll(0)
```

Menu

Statistics > FMM (finite mixture models) > Continuous outcomes > Truncated regression

Syntax

Basic syntax

fmm # : truncreg *depvar* [*indepvars*] [, *options*]

Full syntax

fmm # [*if*] [*in*] [*weight*] [, *fmmopts*]: truncreg *depvar* [*indepvars*] [, *options*]

where # specifies the number of class models.

options	Description
Model	
noconstant	suppress the constant term
ll(*varname* | #)	left-truncation variable or limit
ul(*varname* | #)	right-truncation variable or limit
offset(*varname*)	include *varname* in model with coefficient constrained to 1

indepvars may contain factor variables; see [U] **11.4.3 Factor variables**.

depvar and *indepvars* may contain time-series operators; see [U] **11.4.4 Time-series varlists**.

For a detailed description of *options*, see *Options* in [R] **truncreg**.

fmmopts	Description
Model	
lcinvariant(*pclassname*)	specify parameters that are equal across classes; default is lcinvariant(none)
lcprob(*varlist*)	specify independent variables for class probabilities
lclabel(*name*)	name of the categorical latent variable; default is lclabel(Class)
lcbase(#)	base latent class
constraints(*constraints*)	apply specified linear constraints
SE/Robust	
vce(*vcetype*)	*vcetype* may be oim, opg, robust, or cluster *clustvar*
Reporting	
level(#)	set confidence level; default is level(95)
nocnsreport	do not display constraints
noheader	do not display header above parameter table
nodvheader	do not display dependent variables information in the header
notable	do not display parameter table
display_options	control columns and column formats, row spacing, line width, display of omitted variables and base and empty cells, and factor-variable labeling
Maximization	
maximize_options	control the maximization process
startvalues(*svmethod*)	method for obtaining starting values; default is startvalues(factor)
emopts(*maxopts*)	control EM algorithm for improved starting values
noestimate	do not fit the model; show starting values instead
collinear	keep collinear variables
coeflegend	display legend instead of statistics

varlist may contain factor variables; see **[U] 11.4.3 Factor variables**.

by, collect, statsby, and svy are allowed; see **[U] 11.1.10 Prefix commands**.

vce() and weights are not allowed with the svy prefix; see **[SVY] svy**.

fweights, iweights, and pweights are allowed; see **[U] 11.1.6 weight**.

collinear and coeflegend do not appear in the dialog box.

See **[U] 20 Estimation and postestimation commands** for more capabilities of estimation commands.

For a detailed description of *fmmopts*, see *Options* in **[FMM] fmm**.

pclassname	Description
cons	intercepts and cutpoints
coef	fixed coefficients
errvar	covariances of errors
scale	scaling parameters
all	all the above
none	none of the above; the default

Remarks and examples

For a general introduction to finite mixture models, see [FMM] **fmm intro**. For general information about truncated regression, see [R] **truncreg**. For examples using `fmm`, see examples in *Contents*.

Stored results

See *Stored results* in [FMM] **fmm**.

Methods and formulas

See *Methods and formulas* in [FMM] **fmm**.
