

# Subject index

## A

absorbing event .....367, 404  
accelerated longitudinal design ..... 184  
adaptive quadrature.....258–263  
age-period-cohort.....183  
agreement ..... 60  
analysis of covariance..... 25  
analysis of variance..... 8–11  
applications  
    adolescent-alcohol-use data... 226  
    airline cost data..... 501  
    anorexia data ..... 41  
    antibiotics data ..... 468  
    antisocial-behavior data .. 138, 224  
    attitudes-to-abortion data .... 327  
    blindness data.....370, 425  
    brothers' school transition data...  
        ..... 370  
    child mortality data. 352, 369, 401  
    children's growth data... 210, 224  
    cigarette data ..... 371, 470  
    dairy-cow data ..... 280, 467  
    diffusion-of-innovations data... 224  
    epileptic-fit data ..... 420  
    essay-grading data.... 88, 312, 326  
    faculty salary data ..... 3  
    family birthweight data ..... 176  
    Fife school data ..... 481, 501  
    first intercourse data ..... 368  
    general-health-questionnaire data..  
        ..... 86  
    Georgian birthweight data..... 89,  
        136, 139  
    grade-point-average data ..... 134  
    Grunfeld investment data ..... 474  
    Guatemalan immunization data ..  
        ..... 443

## applications, *continued*

    head-size data .....89  
    headache data ..... 421  
    health-care reform data .. 376, 470  
    high-school-and-beyond data...40,  
        137, 174  
    homework data ..... 175  
    inner-London schools data .... 141,  
        173  
    instructional improvement data...  
        ..... 465  
    jaw-growth data.....135, 224  
    labor-participation data..... 233  
    lip-cancer data ..... 407, 425  
    marriage data ..... 328  
    math-achievement data ..... 463  
    neighborhood-effects data.....87,  
        133, 504  
    nitrogen data ..... 505  
    Ohio wheeze data ..... 275  
    olympic skating data ..... 506  
    patent data ..... 423  
    peak-expiratory-flow data .. 52, 86,  
        433, 471, 472  
    PISA data ..... 282  
    police stops data ..... 422  
    promotions data.....334, 367  
    rat-pups data ..... 135  
    recovery after surgery data.... 329  
    respiratory-illness data ..... 324  
    salamander mating data..... 493  
    schizophrenia trial data ..... 295  
    school retention in Thailand data  
        ..... 281  
    school-absenteeism data..... 424  
    skin-cancer data..... 426, 470

applications, *continued*

- smoking and birthweight data... 42,  
91, 507
- smoking-intervention data... 325,  
469
- tax-preparer data ..... 132
- teacher turnover data ..... 368
- toenail infection data..... 242, 275
- Tower-of-London data..... 468
- twin-neuroticism data ..... 87
- unemployment-claims data... 226
- union membership data ..... 280
- U.S. production data..... 466, 502
- vaginal-bleeding data..... 276
- verbal-aggression data... 277, 324
- video-ratings data..... 502
- wage-panel data ..... 136, 180, 223
- wheat and moisture data..... 175
- wine tasting data ..... 284
- women's employment data... 279
- attrition ..... 378
- autoregressive model..... 204–205

**B**

- bar plot ..... 243
- baseline hazards ..... 343
- best linear unbiased predictor..... 82
- between estimator..... 109–110
- binary response ..... *see* dichotomous  
response
- binomial distribution ..... 274, 374
- bivariate normal distribution..... 149,  
150, 169, 305, 385
- BLUP..... *see* best linear unbiased  
predictor

**C**

- censoring ..... 331–333
- clustered data..... 51, 431
- coefficient of determination..... 13,  
102–104
- cohort-sequential design ..... 184

## commands

- adjust ..... 10, 107
  - by() option..... 107
  - ci option ..... 107, 108
  - format() option..... 108
- anova ..... 10
  - continuous() option..... 190
  - repeated() option ..... 192
- append..... 364
- by ..... 345
  - sort option..... 204
- clogit..... 272
  - or option..... 272
- cloglog ..... 357
- correlate ..... 144, 186
  - covariance option ..... 144
- describe ..... 137
- egen..... 296, 297, 481, 486
  - anymatch() function..... 297
  - count() function..... 398
  - cut() function..... 353
  - group() function..... 486
  - mean() function..... 119, 296
  - tag() function..... 481
  - total() function..... 482
- encode..... 433
- eq ..... 509, 512
- estat recovariance .... 156, 219
- estimates save ..... 68, 101
- estimates store ..... 67
- foreach ..... 119
- generate ..... 53
- gllamm ..... 66–68, 157, 251–252,  
509–511, 515–526
  - adapt option..... 66, 303, 447
  - bmatrix() option..... 519
  - cluster() option..... 328
  - copy option..... 158, 263
  - denom() option ..... 275, 374
  - eform option ..... 252, 303, 384,  
448
  - eqs() option ..... 158, 384, 447,  
456, 510, 518
  - family() option.. 251, 410, 510,  
518

commands, *gllamm*, *continued*

family(binom) option..... 251

   intercept . . . . . 55, 510  
   slope . . . . . 510  
 random-coefficient  
   logistic regression . . . . . 453–460  
   model . . . . . 146–153  
   Poisson regression . . . . . 385–389  
   proportional odds model . . . . 305–307  
 random-intercept  
   logistic regression . . . . . 247–252,  
     444–453  
   model . . . . . 94–97  
   ordinal probit model . . . . . 312–323  
   Poisson regression . . . . . 380–385,  
     410–414  
   proportional odds model . . . . 303–304  
 recurrent event . . . . . 367  
 reduced form . . . . . 169, 216  
 reference group . . . . . 19  
 regression coefficient . . . . . 11  
 regression sum of squares . . . . . see model  
   sum of squares  
 reliability . . . . . 58  
 REML . . . . . see restricted maximum  
   likelihood  
 repeated measures . . . . . see longitudinal  
   data, 179

residual sum of squares . . . . . see sum of squared errors  
 residuals . . . . . 38–39, 125–128  
 restricted maximum likelihood . . . . . 72  
 risk set . . . . . 336

**S**

sandwich estimator . . . . . 20, 74, 273, 328  
 scaled probit link . . . . . 315  
 scatterplot . . . . . 142  
 score test . . . . . 70  
 shrinkage . . . . . 82, 163, 266, 413  
 simple linear regression . . . . . 11–18  
 simulation . . . . . 207–209, 397–400  
 slope . . . . . 11  
 small-area estimation . . . . . 407  
 spherical quadrature . . . . . 158, 263  
 sphericity . . . . . 192  
 SSC . . . . . 491  
 standardized mortality ratio . . . . . 407  
 standardized regression coefficient . . . . . 16  
 state dependence . . . . . 279  
 stock sample . . . . . 351  
 subject-specific effect . . . . . 254  
 subject-specific probability . . . . . 307  
 sum of squared errors . . . . . 8  
 survey weights . . . . . 283  
 survival function . . . . . 336

**T**

*t* test . . . . . see independent-samples *t* test  
 three-level model . . . . . 432, 436–460  
 three-stage formulation . . . . . 439  
 three-way interaction . . . . . 29  
 time-varying covariate . . . . . 181, 333–334  
 total sum of squares . . . . . 8  
 trellis graph . . . . . 218  
 truncation . . . . . 331–333  
 two-level model . . . . . 56, 433–436  
 two-stage formulation . . . . . 168, 216  
 two-way  
   error-components model . . . . . 473,  
   475–480  
   interactions . . . . . 29

**U**

unconditional model . . . . . 103  
 underdispersion . . . . . 376

**V**

variance components . . . . . 58–61

**W**

Wald test . . . . . 104–106, 120  
 within estimator . . . . . 111–113
