

Subject and author index

This is the subject and author index for the *Stata Multivariate Statistics Reference Manual*. Readers interested in topics other than cluster analysis should see the combined subject index (and the combined author index) in the *Stata Quick Reference and Index*. The combined index indexes the *Getting Started* manuals, the *User's Guide*, and all the Reference manuals except the *Mata Reference Manual*.

Semicolons set off the most important entries from the rest. Sometimes no entry will be set off with semicolons, meaning that all entries are equally important.
