

scheme_option — Option for specifying scheme

[Description](#) [Quick start](#) [Syntax](#) [Option](#) [Remarks and examples](#)
[Also see](#)

Description

Option `scheme()` specifies the graphics scheme to be used. The scheme specifies the overall look of the graph.

Quick start

Render the graph using monochromatic scheme `s1mono`

graph_command ... , ... `scheme(s1mono)`

Render the graph in the manner of the *Economist* magazine

graph_command ... , ... `scheme(economist)`

Render the graph using the preferred look for the *Stata Journal*

graph_command ... , ... `scheme(sj)`

Render the graph using a color scheme with higher contrast than the default color scheme

graph_command ... , ... `scheme(s1color)`

Render the graph with a color scheme using a black background

graph_command ... , ... `scheme(s1rcolor)`

Syntax

<i>scheme_option</i>	Description
<code><u>s</u>cheme(<i>schemename</i>)</code>	specify scheme to be used

`scheme()` is *unique*; see [G-4] **concept: repeated options**.

For a list of available *schemenames*, see [G-4] **schemes intro**.

Option

`scheme(schemename)` specifies the scheme to be used. If `scheme()` is not specified the default scheme is used; see [G-4] **schemes intro**.

Remarks and examples

stata.com

See [G-4] **schemes intro**.
