Title   stata.com

> **graph copy** — Copy graph in memory

Syntax

> <u>gr</u>aph copy [*oldname*] *newname* [, replace]

If *oldname* is not specified, the name of the current graph is assumed.

Menu

Graphics > Manage graphs > Copy graph in memory

Description

graph copy makes a copy of a graph stored in memory under a new name.

Option

replace specifies that it is okay to replace *newname*, if it already exists.

Remarks and examples   stata.com

See [G-2] **graph manipulation** for an introduction to the graph manipulation commands.

graph copy is rarely used. Perhaps you have a graph displayed in the Graph window (known as the current graph), and you wish to experiment with changing its aspect ratio or scheme using the graph display command. Before starting your experiments, you make a copy of the original:

```
. graph copy backup
. graph display ...
```
