

ringposstyle — Choices for location: Distance from plot region

Syntax Description Remarks and examples Also see

Syntax

ringposstyle is

$0 \leq \# \leq 100$, # real

Description

ringposstyle is specified inside options such as ring() and is typically used in conjunction with clockposstyle (see [G-4] clockposstyle) to specify a position for titles, subtitles, etc.

Remarks and examples

See Positioning of titles under Remarks and examples of [G-3] title_options.
