

estimates title — Set title for estimation results

[Syntax](#)[Menu](#)[Description](#)[Remarks and examples](#)[Also see](#)

Syntax

```
estimates title: [text]
```

```
estimates title
```

Menu

Statistics > Postestimation > Manage estimation results > Title/retitle results

Description

`estimates title:` (note the colon) sets or clears the title for the current estimation results. The title is used by `estimates table` and `estimates stats` (see [R] [estimates table](#) and [R] [estimates stats](#)).

`estimates title` without the colon displays the current title.

Remarks and examples

[stata.com](#)

After setting the title, if estimates have been stored, do not forget to store them again:

```
. use http://www.stata-press.com/data/r13/auto
(1978 Automobile Data)
. regress mpg gear turn
(output omitted)
. estimates store reg
```

Now let's add a title:

```
. estimates title: "My regression"
. estimates store reg
```
