

# Subject and author index

This is the subject and author index for the *Structural Equation Modeling Reference Manual*. Readers interested in topics other than structural equation modeling should see the [combined subject index](#) (and the [combined author index](#)) in the *Glossary and Index*.

## A

Acocck, A. C., [SEM] [intro 4](#), [SEM] [intro 5](#),  
[SEM] [intro 6](#), [SEM] [intro 11](#),  
[SEM] [example 1](#), [SEM] [example 3](#),  
[SEM] [example 7](#), [SEM] [example 9](#),  
[SEM] [example 18](#), [SEM] [example 20](#)

adaptopt() option, see [gsem option adaptopts\(\)](#)

addgroup, `ssd` subcommand, [SEM] [ssd](#)

ADF, see [asymptotic distribution free](#)

adf, see [sem option method\(\)](#)

AIC, see [Akaike information criterion](#)

Akaike information criterion, [SEM] [estat gof](#),  
[SEM] [example 4](#), [SEM] [methods and formulas for sem](#)

Akaike, H., [SEM] [estat gof](#), [SEM] [methods and formulas for sem](#)

allmissing option, see [sem option allmissing](#)

Alwin, D. F., [SEM] [example 9](#)

anchoring, see [constraints, normalization](#)

Andrich, D., [SEM] [example 28g](#)

asymptotic distribution free, [SEM] [intro 4](#),  
[SEM] [methods and formulas for sem](#),  
[SEM] [Glossary](#)

## B

Baron, R. M., [SEM] [example 42g](#)

baseline comparisons, [SEM] [estat gof](#),  
[SEM] [example 4](#)

baseline model, [SEM] [estat gof](#), [SEM] [example 4](#),  
[SEM] [methods and formulas for sem](#),  
[SEM] [Glossary](#)

baseopts option, see [sem option baseopts\(\)](#)

Bayesian information criterion, [SEM] [estat gof](#),  
[SEM] [example 4](#), [SEM] [methods and formulas for sem](#)

Bentham, G., [SEM] [example 39g](#)

Bentler, P. M., [SEM] [estat eqgof](#), [SEM] [estat framework](#), [SEM] [estat gof](#), [SEM] [estat stable](#), [SEM] [example 3](#), [SEM] [methods and formulas for sem](#)

Bentler–Raykov squared multiple-correlation coefficient, [SEM] [estat eqgof](#)

Bentler–Weeks matrices, [SEM] [intro 7](#), [SEM] [estat framework](#), [SEM] [example 11](#), [SEM] [Glossary](#)

BIC, see [Bayesian information criterion](#)

binary outcome model, [SEM] [intro 5](#),  
[SEM] [example 27g](#), [SEM] [example 28g](#),  
[SEM] [example 29g](#), [SEM] [example 30g](#),  
[SEM] [example 31g](#), [SEM] [example 32g](#),  
[SEM] [example 33g](#), [SEM] [example 34g](#)

Bollen, K. A., [SEM] [intro 4](#), [SEM] [intro 5](#),  
[SEM] [estat residuals](#), [SEM] [estat teffects](#),  
[SEM] [example 10](#), [SEM] [example 15](#),  
[SEM] [methods and formulas for sem](#),  
[SEM] [predict after sem](#), [SEM] [sem reporting options](#)

Bond, T. G., [SEM] [example 28g](#)

bootstrap, [SEM] [Glossary](#)

Boyle, P., [SEM] [example 39g](#)

Brown, T. A., [SEM] [intro 4](#)

Browne, M. W., [SEM] [estat gof](#), [SEM] [methods and formulas for sem](#)

build, `ssd` subcommand, [SEM] [ssd](#)

Builder (GUI), [SEM] [Glossary](#)

## C

Campbell, D. T., [SEM] [example 17](#)

CD, see [coefficient of determination](#)

Center for Human Resource Research,  
[SEM] [example 38g](#), [SEM] [example 46g](#)

CFA, see [confirmatory factor analysis](#)

CFI, see [comparative fit index](#)

chi-squared test, [SEM] [methods and formulas for sem](#)

CI, see [confidence interval](#)

cloglog option, see [gsem option cloglog](#)

cluster, see [gsem option vce\(\)](#), see [sem option vce\(\)](#)

cluster estimator of variance, structural equation modeling, [SEM] [intro 8](#), [SEM] [sem option method\(\)](#)

clustered, [SEM] [Glossary](#)

coefficient of determination, [SEM] [estat eqgof](#),  
[SEM] [estat ggof](#), [SEM] [estat gof](#),  
[SEM] [example 4](#), [SEM] [example 21](#),  
[SEM] [methods and formulas for sem](#),  
[SEM] [Glossary](#)

coeflegend option, see [gsem option coeflegend](#), see [sem option coeflegend](#)

collinear option, see [gsem option collinear](#)

command language, [SEM] [Glossary](#)

comparative fit index, [SEM] [estat gof](#), [SEM] [methods and formulas for sem](#)

complementary log-log regression, [SEM] [Glossary](#)

conditional normality, see [normality, conditional confidence interval](#), [SEM] [Glossary](#)

confirmatory factor analysis, [SEM] [intro 5](#),  
[SEM] [example 15](#), [SEM] [example 30g](#),  
[SEM] [Glossary](#)

constraints, [SEM] [sem and gsem option constraints\(\)](#),  
[SEM] [Glossary](#)

across groups, [SEM] [intro 6](#)

normalization, [SEM] [intro 4](#), [SEM] [gsem](#),  
[SEM] [sem](#), [SEM] [Glossary](#)

constraints, *continued*

relaxing, [SEM] [intro 6](#), [SEM] [sem and gsem path notation](#), [SEM] [sem path notation extensions](#)

specifying, [SEM] [intro 4](#), [SEM] [intro 6](#), [SEM] [sem and gsem option constraints\(\)](#), [SEM] [sem and gsem option covstructure\(\)](#), [SEM] [sem and gsem path notation](#), [SEM] [sem path notation extensions](#)

`constraints()` option, see [gsem option constraints\(\)](#), see [sem option constraints\(\)](#)

contrast command, [SEM] [intro 7](#)

convergence, [SEM] [intro 12](#), [SEM] [sem](#), [SEM] [sem and gsem option from\(\)](#)

correlated uniqueness model, [SEM] [intro 5](#),

[SEM] [example 17](#), [SEM] [Glossary](#)

correlation model, [SEM] [intro 5](#), [SEM] [Glossary](#)

correlation, tests of, [SEM] [estat stdize](#), [SEM] [example 16](#)

count model, [SEM] [intro 5](#), [SEM] [example 34g](#), [SEM] [example 39g](#)

covariance, [SEM] [intro 4](#), [SEM] [Glossary](#)

assumptions, [SEM] [gsem](#), [SEM] [sem](#)

`covariance()` option, see [gsem option covariance\(\)](#), see [sem option covariance\(\)](#)

covariances, creating dataset from, see [summary statistics data](#)

`covstructure()` option, see [gsem option covstructure\(\)](#), see [sem option covstructure\(\)](#)

Cox, C., [SEM] [example 2](#)

crossed-effects model, [SEM] [example 40g](#), [SEM] [Glossary](#)

Cudeck, R., [SEM] [estat gof](#), [SEM] [methods and formulas for sem](#)

curved path, [SEM] [Glossary](#)

## D

`datasignature` command, [SEM] [example 25](#), [SEM] [ssd](#)

degree-of-freedom adjustment, [SEM] [Glossary](#)

delta method, [SEM] [estat residuals](#), [SEM] [estat teffects](#)

describe, `ssd` subcommand, [SEM] [ssd](#)

digitally signing data, see [datasignature](#) command

Duncan, O. D., [SEM] [example 7](#)

## E

Eaves, R. C., [SEM] [example 2](#)

effects,

direct, [SEM] [estat teffects](#), [SEM] [example 7](#), [SEM] [example 42g](#), [SEM] [methods and formulas for sem](#), [SEM] [Glossary](#)

effects, *continued*

indirect, [SEM] [estat teffects](#), [SEM] [example 7](#), [SEM] [example 42g](#), [SEM] [methods and formulas for sem](#), [SEM] [Glossary](#)

total, [SEM] [estat teffects](#), [SEM] [example 7](#), [SEM] [example 42g](#), [SEM] [methods and formulas for sem](#), [SEM] [Glossary](#)

`eform`, `estat` subcommand, [SEM] [estat eform](#)

eigenvalue stability index, [SEM] [estat stable](#)

EIM, see [expected information matrix](#)

`eim`, see [sem option vce\(\)](#)

Embretson, S. E., [SEM] [example 28g](#),

[SEM] [example 29g](#)

empirical Bayes predictions, [SEM] [intro 7](#),

[SEM] [methods and formulas for gsem](#),

[SEM] [predict after gsem](#)

endogenous treatment-effects model,

[SEM] [example 46g](#)

endogenous variable, [SEM] [intro 4](#), [SEM] [Glossary](#)

`eqgof`, `estat` subcommand, [SEM] [estat eqgof](#)

`eqtest`, `estat` subcommand, [SEM] [estat eqtest](#)

error, [SEM] [Glossary](#)

variable, [SEM] [intro 4](#), [SEM] [Glossary](#)

`estat`

`eform` command, [SEM] [intro 7](#), [SEM] [estat eform](#), [SEM] [example 33g](#), [SEM] [example 34g](#)

`eqgof` command, [SEM] [intro 7](#), [SEM] [estat eqgof](#), [SEM] [example 3](#)

`eqtest` command, [SEM] [intro 7](#), [SEM] [estat eqtest](#), [SEM] [example 13](#)

`framework` command, [SEM] [intro 7](#), [SEM] [estat framework](#), [SEM] [example 11](#)

`ggof` command, [SEM] [intro 7](#), [SEM] [estat ggof](#), [SEM] [example 21](#)

`ginvariant` command, [SEM] [intro 7](#), [SEM] [estat ginvariant](#), [SEM] [example 22](#)

`gof` command, [SEM] [estat gof](#), [SEM] [example 4](#)

`mindices` command, [SEM] [intro 7](#), [SEM] [estat mindices](#), [SEM] [example 5](#), [SEM] [example 9](#)

`residuals` command, [SEM] [intro 7](#), [SEM] [estat residuals](#), [SEM] [example 10](#)

`scoretests` command, [SEM] [intro 7](#), [SEM] [estat scoretests](#), [SEM] [example 8](#)

`stable` command, [SEM] [intro 7](#), [SEM] [estat stable](#), [SEM] [example 7](#)

`stdize`: prefix command, [SEM] [estat stdize](#), [SEM] [example 16](#)

`summarize` command, [SEM] [estat summarize teffects](#) command, [SEM] [estat teffects](#), [SEM] [example 7](#), [SEM] [example 42g](#)

estimation method, [SEM] [Glossary](#)

estimation options, [SEM] [gsem estimation options](#), [SEM] [sem estimation options](#)

`_Ex`, [SEM] [sem and gsem option covstructure\(\)](#)

exogenous variable, [SEM] [intro 4](#), [SEM] [Glossary](#)

expected information matrix, [SEM] [Glossary](#)

exponentiated coefficients, [SEM] [estat eform](#)  
 exposure() option, see [gsem option exposure\(\)](#)

## F

factor analysis, see [confirmatory factor analysis](#)

factor scores, [SEM] [intro 7](#), [SEM] [example 14](#),  
 [SEM] [methods and formulas for sem](#),  
 [SEM] [predict after sem](#)

factor-variable notation, [SEM] [intro 3](#)

family

Bernoulli, [SEM] [methods and formulas for gsem](#)

binomial, [SEM] [methods and formulas for gsem](#)

distribution, [SEM] [Glossary](#)

gamma, [SEM] [methods and formulas for gsem](#)

Gaussian, [SEM] [methods and formulas for gsem](#)

multinomial, [SEM] [methods and formulas for gsem](#)

negative binomial, [SEM] [methods and formulas for gsem](#)

ordinal, [SEM] [methods and formulas for gsem](#)

Poisson, [SEM] [methods and formulas for gsem](#)

family() option, see [gsem option family\(\)](#)

feasible generalized least squares, [SEM] [intro 4](#)

feedback loops, [SEM] [estat stable](#), [SEM] [estat teffects](#)

fictional data, [SEM] [Glossary](#)

first-order latent variables, [SEM] [Glossary](#)

Fischer, G. H., [SEM] [example 28g](#)

Fiske, D. W., [SEM] [example 17](#)

forcecorrelations option, see [sem option forcecorrelations](#)

forcenoanchor option, see [gsem option forcenoanchor](#), see [sem option forcenoanchor](#)

forcexconditional option, see [sem option forcexconditional](#)

Fox, C. M., [SEM] [example 28g](#)

framework, [estat](#) subcommand, [SEM] [estat framework](#)

Freeman, E. H., [SEM] [estat stable](#)

from() option, see [gsem option from\(\)](#), see [sem option from\(\)](#)

fvstandard option, see [gsem option fvstandard](#)

fvwrap() option, see [sem option fvwrap\(\)](#)

fvwrapon() option, see [sem option fvwrapon\(\)](#)

## G

gamma option, see [gsem option gamma](#)

gamma regression, [SEM] [intro 5](#), [SEM] [Glossary](#)

Gaussian regression, [SEM] [Glossary](#)

generalized

least squares, feasible, see [feasible generalized least squares](#)

linear response functions, [SEM] [Glossary](#)

method of moments, [SEM] [Glossary](#)

generalized, *continued*

response variables, [SEM] [intro 2](#), [SEM] [intro 5](#),  
 [SEM] [gsem family-and-link options](#)

responses, combined, [SEM] [example 34g](#)

SEM, [SEM] [Glossary](#)

ggof, [estat](#) subcommand, [SEM] [estat ggof](#)

ginvariant, [estat](#) subcommand, [SEM] [estat ginvariant](#)

ginvariant() option, see [sem option ginvariant\(\)](#)

GMM, see [generalized method of moments](#)

gof, [estat](#) subcommand, [SEM] [estat gof](#)

goodness of fit, [SEM] [intro 7](#), [SEM] [estat](#)

[eggo](#), [SEM] [estat ggof](#), [SEM] [estat](#)

[gof](#), [SEM] [example 3](#), [SEM] [example 4](#),

[SEM] [Glossary](#)

graphical user interface, [SEM] [Builder](#),

[SEM] [Builder, generalized](#), [SEM] [Glossary](#)

Greenacre, M. J., [SEM] [example 35g](#),

[SEM] [example 36g](#)

Greenfield, S., [SEM] [example 37g](#)

Gronau, R., [SEM] [example 45g](#)

group invariance test, [SEM] [methods and formulas for sem](#)

group() option, see [sem option group\(\)](#)

gsem command, [SEM] [Builder, generalized](#),

[SEM] [example 1](#), [SEM] [example 27g](#),

[SEM] [example 28g](#), [SEM] [example 29g](#),

[SEM] [example 30g](#), [SEM] [example 31g](#),

[SEM] [example 32g](#), [SEM] [example 33g](#),

[SEM] [example 34g](#), [SEM] [example 35g](#),

[SEM] [example 36g](#), [SEM] [example 37g](#),

[SEM] [example 38g](#), [SEM] [example 39g](#),

[SEM] [example 40g](#), [SEM] [example 41g](#),

[SEM] [example 42g](#), [SEM] [example 43g](#),

[SEM] [example 44g](#), [SEM] [example 45g](#),

[SEM] [example 46g](#), [SEM] [gsem](#), [SEM] [gsem](#)

[family-and-link options](#), [SEM] [gsem model](#)

## H

Haller, A. O., [SEM] [example 7](#)

Hambleton, R. K., [SEM] [example 28g](#), [SEM] [example 29g](#)

Hancock, G. R., [SEM] [estat gof](#), [SEM] [methods and formulas for sem](#)

Hausman, J. A., [SEM] [estat residuals](#), [SEM] [methods and formulas for sem](#)

Heckman selection model, [SEM] [example 43g](#)

Heckman, J., [SEM] [example 45g](#)

higher-order models, see [confirmatory factor analysis](#)

Hocevar, D., [SEM] [example 19](#)

Hosmer, D. W., Jr., [SEM] [example 33g](#), [SEM] [example 34g](#)

Huber, C., [SEM] [Builder](#), [SEM] [Builder, generalized](#)

Huber/White/sandwich estimator of variance, see [robust](#), [Huber/White/sandwich estimator of variance](#)

hypothesis test, [SEM] [test](#), [SEM] [testnl](#)

## I

identification, see [model identification](#)

indicator variables, [SEM] [Glossary](#)

information criteria, see [Akaike information criterion](#), [Bayesian information criterion](#)

init, *ssd* subcommand, [SEM] *ssd*

initial values, [SEM] [Glossary](#), see [starting values](#)

intercept, [SEM] [intro 4](#), [SEM] [Glossary](#), also see [constraints](#), [specifying](#)

interval regression model, [SEM] [example 44g](#)

intmethod() option, see [gsem option intmethod\(\)](#)

intpoints() option, see [gsem option intpoints\(\)](#)

IRT, see [item response theory](#)

item response theory, [SEM] [intro 5](#), [SEM] [example 28g](#), [SEM] [example 29g](#)

iterate() option, see [gsem option maximize\\_options](#), see [sem option maximize\\_options](#)

## J

jackknife, [SEM] [Glossary](#)

joint normality, see [normality](#), [joint](#)

Jöreskog, K. G., [SEM] [estat residuals](#)

## K

Kenny, D. A., [SEM] [intro 4](#), [SEM] [example 42g](#)

Kline, R. B., [SEM] [intro 4](#), [SEM] [example 3](#), [SEM] [example 4](#), [SEM] [example 5](#)

Krull, J. L., [SEM] [example 42g](#)

## L

Lagrange multiplier test, [SEM] [estat ginvariant](#), [SEM] [estat mindices](#), [SEM] [estat scoretests](#), [SEM] [Glossary](#)

Langford, I. H., [SEM] [example 39g](#)

Laplacian approximation, [SEM] **methods and formulas for gsem**

latent growth model, [SEM] **intro 5**, [SEM] **example 18**, [SEM] **Glossary**

latent() option, see **gsem option latent()**, see **sem option latent()**

latent variable, [SEM] **intro 4**, [SEM] **Glossary**

Lemeshow, S. A., [SEM] **example 33g**, [SEM] **example 34g**

level() option, see **gsem option level()**, see **sem option level()**

Lewis, H. G., [SEM] **example 45g**

\_LEx, [SEM] **sem and gsem option covstructure()**

likelihood-ratio test, [SEM] **lrtest**, [SEM] **methods and formulas for sem**

lincom command, [SEM] **intro 7**, [SEM] **estat stzide**, [SEM] **lincom**

linear regression, [SEM] **intro 5**, [SEM] **example 6**, [SEM] **Glossary**

link

- complementary log-log, [SEM] **methods and formulas for gsem**
- function, [SEM] **Glossary**
- identity, [SEM] **methods and formulas for gsem**

list, **ssd** subcommand, [SEM] **ssd**

listwise option, see **gsem option listwise**

log likelihood, [SEM] **methods and formulas for gsem**, [SEM] **methods and formulas for sem**

logistic and logit regression, [SEM] **intro 5**, [SEM] **example 33g**, [SEM] **example 34g**, [SEM] **Glossary**

logit option, see **gsem option logit**

lrtest command, [SEM] **example 10**, [SEM] **example 39g**, [SEM] **lrtest**

## M

MacKinnon, D. P., [SEM] **example 42g**

Mair, C. S., [SEM] **example 39g**

manifest variables, [SEM] **Glossary**

MAR, see **missing values**

margins command, [SEM] **intro 7**

Marsh, H. W., [SEM] **example 19**

*maximize\_options*, see **gsem option maximize\_options**, see **sem option maximize\_options**

maximum likelihood, [SEM] **intro 4**, [SEM] **methods and formulas for gsem**, [SEM] **methods and formulas for sem**, [SEM] **Glossary**

- with missing values, [SEM] **example 26**, [SEM] **Glossary**

McDonald, A., [SEM] **example 39g**

means() option, see **gsem option means()**, see **sem option means()**

measurement

- component, [SEM] **Glossary**
- error, [SEM] **intro 5**, [SEM] **example 1**, [SEM] **example 27g**
- model, [SEM] **intro 5**, [SEM] **example 1**, [SEM] **example 3**, [SEM] **example 20**, [SEM] **example 27g**, [SEM] **example 30g**, [SEM] **example 31g**, [SEM] **Glossary**
- variables, [SEM] **Glossary**

mediation model, [SEM] **intro 5**, [SEM] **example 42g**

Mehta, P. D., [SEM] **example 30g**

method, [SEM] **Glossary**

method() option, see **gsem option method()**, see **sem option method()**

MIMIC models, see **multiple indicators and multiple causes model**

mindices, **estat** subcommand, [SEM] **estat mindices**

missing values, [SEM] **example 26**

mixed-effects model, see **multilevel model**

ML, see **maximum likelihood**

ml, see **gsem option method()**, see **sem option method()**

MLMV, see **maximum likelihood with missing values**

mlmv, see **sem option method()**

mlogit option, see **gsem option mlogit**

model identification, [SEM] **intro 4**, [SEM] **intro 12**, [SEM] **Glossary**

model simplification test, [SEM] **example 8**, [SEM] **example 10**

model-implied covariances and correlations, [SEM] **example 11**

modification indices, [SEM] **estat mindices**, [SEM] **example 5**, [SEM] **methods and formulas for sem**, [SEM] **Glossary**

Molenaar, I. W., [SEM] **example 28g**

moments (of a distribution), [SEM] **Glossary**

MTMM, see **multitrait–multimethod data and matrices**

Mueller, R. O., [SEM] **estat gof**, [SEM] **methods and formulas for sem**

multilevel latent variable, [SEM] **intro 2**, [SEM] **gsem path notation extensions**

multilevel mixed-effects model, see **multilevel model**

multilevel model, [SEM] **intro 5**, [SEM] **example 30g**, [SEM] **example 38g**, [SEM] **example 39g**, [SEM] **example 40g**, [SEM] **example 41g**, [SEM] **example 42g**, [SEM] **Glossary**

multinomial logistic regression, [SEM] **intro 2**, [SEM] **intro 5**, [SEM] **example 37g**, [SEM] **example 41g**, [SEM] **Glossary**

multiple correlation, [SEM] **Glossary**

multiple indicators and multiple causes model, [SEM] **intro 5**, [SEM] **example 10**, [SEM] **Glossary**

multiple indicators multiple causes model, [SEM] **example 36g**

multitrait–multimethod data and matrices, [SEM] **intro 5**, [SEM] **example 17**

multivariate regression, [SEM] [example 12](#),  
[SEM] [Glossary](#), also see [seemingly unrelated regression](#), see [multivariate regression](#)

Muthén, B., [SEM] [example 9](#)

## N

`nbreg` option, see `gsem option nbreg`

Neale, M. C., [SEM] [example 30g](#)

negative binomial, [SEM] [example 39g](#)

negative binomial regression, [SEM] [Glossary](#)

Nelson, E. C., [SEM] [example 37g](#)

nested-effects model, [SEM] [Glossary](#)

`nlcom` command, [SEM] [intro 7](#), [SEM] [estat stdize](#),  
[SEM] [example 42g](#), [SEM] [nlcom](#)
