

Contents

intro	Introduction to longitudinal-data/panel-data manual
xt	Introduction to xt commands
quadchk	Check sensitivity of quadrature approximation
vce_options	Variance estimators
xtabond	Arellano–Bond linear dynamic panel-data estimation
xtabond postestimation	Postestimation tools for xtabond
xtcloglog	Random-effects and population-averaged cloglog models
xtcloglog postestimation	Postestimation tools for xtcloglog
xtdata	Faster specification searches with xt data
xtdescribe	Describe pattern of xt data
xtdpd	Linear dynamic panel-data estimation
xtdpd postestimation	Postestimation tools for xtdpd
xtdpdsys	Arellano–Bover/Blundell–Bond linear dynamic panel-data estimation
xtdpdsys postestimation	Postestimation tools for xtdpdsys
xtfrontier	Stochastic frontier models for panel data
xtfrontier postestimation	Postestimation tools for xtfrontier
xtgee	Fit population-averaged panel-data models by using GEE
xtgee postestimation	Postestimation tools for xtgee
xtgls	Fit panel-data models by using GLS
xtgls postestimation	Postestimation tools for xtgls
xhtaylor	Hausman–Taylor estimator for error-components models
xhtaylor postestimation	Postestimation tools for xhtaylor
xtintreg	Random-effects interval-data regression models
xtintreg postestimation	Postestimation tools for xtintreg
xtivreg	Instrumental variables and two-stage least squares for panel-data models
xtivreg postestimation	Postestimation tools for xtivreg
xtline	Panel-data line plots
xtlogit	Fixed-effects, random-effects, and population-averaged logit models
xtlogit postestimation	Postestimation tools for xtlogit
xtnbreg	Fixed-effects, random-effects, & population-averaged negative binomial models

<code>xtnbreg</code>	Postestimation tools for <code>xtnbreg</code>
<code>xtologit</code>	Random-effects ordered logistic models
<code>xtologit</code> postestimation	Postestimation tools for <code>xtologit</code>
<code>xtoprobit</code>	Random-effects ordered probit models
<code>xtoprobit</code> postestimation	Postestimation tools for <code>xtoprobit</code>
<code>xtpcse</code>	Linear regression with panel-corrected standard errors
<code>xtpcse</code> postestimation	Postestimation tools for <code>xtpcse</code>
<code>xtpoisson</code>	Fixed-effects, random-effects, and population-averaged Poisson models
<code>xtpoisson</code> postestimation	Postestimation tools for <code>xtpoisson</code>
<code>xtprobit</code>	Random-effects and population-averaged probit models
<code>xtprobit</code> postestimation	Postestimation tools for <code>xtprobit</code>
<code>xtrc</code>	Random-coefficients model
<code>xtrc</code> postestimation	Postestimation tools for <code>xtrc</code>
<code>xtrg</code>	Fixed-, between-, and random-effects and population-averaged linear models
<code>xtrg</code> postestimation	Postestimation tools for <code>xtrg</code>
<code>xtregar</code>	Fixed- and random-effects linear models with an AR(1) disturbance
<code>xtregar</code> postestimation	Postestimation tools for <code>xtregar</code>
<code>xtset</code>	Declare data to be panel data
<code>xtsum</code>	Summarize xt data
<code>xttab</code>	Tabulate xt data
<code>xttobit</code>	Random-effects tobit models
<code>xttobit</code> postestimation	Postestimation tools for <code>xttobit</code>
<code>xtunitroot</code>	Panel-data unit-root tests
