

graph play — Apply edits from a recording on current graph

[Description](#)[Syntax](#)[Remarks and examples](#)[Also see](#)

Description

`graph play` applies edits that were previously recorded using the Graph Recorder to the current graph.

Syntax

```
graph play recordingname
```

Remarks and examples

[stata.com](#)

Edits made in the Graph Editor (see [G-1] [graph editor](#)) can be saved as a recording and the edits subsequently played on another graph. In addition to being played from the Graph Editor, these recordings can be played on the currently active graph using the command `graph play recordingname`.

If you have previously created a recording named `xyz`, you can replay the edits from that recording on your currently active graph by typing

```
. graph play xyz
```

To learn about creating recordings, see [Graph Recorder](#) in [G-1] [graph editor](#).
