

Contents

intro	Introduction to multivariate statistics manual
multivariate	Introduction to multivariate commands
alpha	Compute interitem correlations (covariances) and Cronbach's alpha
biplot	Biplots
ca	Simple correspondence analysis
ca postestimation	Postestimation tools for ca and camat
ca postestimation plots	Postestimation plots for ca and camat
candisc	Canonical linear discriminant analysis
canon	Canonical correlations
canon postestimation	Postestimation tools for canon
cluster	Introduction to cluster-analysis commands
clustermat	Introduction to clustermat commands
cluster dendrogram	Dendrograms for hierarchical cluster analysis
cluster generate	Generate summary or grouping variables from a cluster analysis
cluster kmeans and kmedians	Kmeans and kmedians cluster analysis
cluster linkage	Hierarchical cluster analysis
cluster notes	Place notes in cluster analysis
cluster programming subroutines	Add cluster-analysis routines
cluster programming utilities	Cluster-analysis programming utilities
cluster stop	Cluster-analysis stopping rules
cluster utility	List, rename, use, and drop cluster analyses
discrim	Discriminant analysis
discrim estat	Postestimation tools for discrim
discrim knn	kth-nearest-neighbor discriminant analysis
discrim knn postestimation	Postestimation tools for discrim knn
discrim lda	Linear discriminant analysis
discrim lda postestimation	Postestimation tools for discrim lda
discrim logistic	Logistic discriminant analysis
discrim logistic postestimation	Postestimation tools for discrim logistic
discrim qda	Quadratic discriminant analysis
discrim qda postestimation	Postestimation tools for discrim qda
factor	Factor analysis
factor postestimation	Postestimation tools for factor and factormat
hotelling	Hotelling's T-squared generalized means test
manova	Multivariate analysis of variance and covariance
manova postestimation	Postestimation tools for manova
matrix dissimilarity	Compute similarity or dissimilarity measures
mca	Multiple and joint correspondence analysis
mca postestimation	Postestimation tools for mca
mca postestimation plots	Postestimation plots for mca
mds	Multidimensional scaling for two-way data
mds postestimation	Postestimation tools for mds, mdsmat, and mdslong
mds postestimation plots	Postestimation plots for mds, mdsmat, and mdslong

`mdslong` Multidimensional scaling of proximity data in long format
`mdsmat` Multidimensional scaling of proximity data in a matrix
`measure_option` Option for similarity and dissimilarity measures
`mvreg` Multivariate regression
`mvreg postestimation` Postestimation tools for `mvreg`
`mvtest` Multivariate tests
`mvtest correlations` Multivariate tests of correlations
`mvtest covariances` Multivariate tests of covariances
`mvtest means` Multivariate tests of means
`mvtest normality` Multivariate normality tests

`pca` Principal component analysis
`pca postestimation` Postestimation tools for `pca` and `pcamat`
`procrustes` Procrustes transformation
`procrustes postestimation` Postestimation tools for `procrustes`

`rotate` Orthogonal and oblique rotations after factor and `pca`
`rotatemat` Orthogonal and oblique rotations of a Stata matrix

`scoreplot` Score and loading plots
`screeplot` Scree plot

Glossary

Subject and author index
