<a href="#">intro</a>	Introduction to longitudinal-data/panel-data manual
<a href="#">xt</a>	Introduction to xt commands
<a href="#">quadchk</a>	Check sensitivity of quadrature approximation
<a href="#">vce_options</a>	Variance estimators
<a href="#">xtabond</a>	Arellano–Bond linear dynamic panel-data estimation
<a href="#">xtabond postestimation</a>	Postestimation tools for xtabond
<a href="#">xtcloglog</a>	Random-effects and population-averaged cloglog models
<a href="#">xtcloglog postestimation</a>	Postestimation tools for xtcloglog
<a href="#">xtdata</a>	Faster specification searches with xt data
<a href="#">xtdescribe</a>	Describe pattern of xt data
<a href="#">xtdpd</a>	Linear dynamic panel-data estimation
<a href="#">xtdpd postestimation</a>	Postestimation tools for xtdpd
<a href="#">xtdpdsys</a>	Arellano–Bover/Blundell–Bond linear dynamic panel-data estimation
<a href="#">xtdpdsys postestimation</a>	Postestimation tools for xtdpdsys
<a href="#">xtfrontier</a>	Stochastic frontier models for panel data
<a href="#">xtfrontier postestimation</a>	Postestimation tools for xtfrontier
<a href="#">xtgee</a>	Fit population-averaged panel-data models by using GEE
<a href="#">xtgee postestimation</a>	Postestimation tools for xtgee
<a href="#">xtgls</a>	Fit panel-data models by using GLS
<a href="#">xtgls postestimation</a>	Postestimation tools for xtgls
<a href="#">xhtaylor</a>	Hausman–Taylor estimator for error-components models
<a href="#">xhtaylor postestimation</a>	Postestimation tools for xhtaylor
<a href="#">xtintreg</a>	Random-effects interval-data regression models
<a href="#">xtintreg postestimation</a>	Postestimation tools for xtintreg
<a href="#">xtivreg</a>	Instrumental variables and two-stage least squares for panel-data models
<a href="#">xtivreg postestimation</a>	Postestimation tools for xtivreg
<a href="#">xtline</a>	Panel-data line plots
<a href="#">xtlogit</a>	Fixed-effects, random-effects, and population-averaged logit models
<a href="#">xtlogit postestimation</a>	Postestimation tools for xtlogit
<a href="#">xtnbreg</a>	Fixed-effects, random-effects, & population-averaged negative binomial models

<a href="#">xtnbreg postestimation</a>	Postestimation tools for xtnbreg
<a href="#">xtlogit</a>	Random-effects ordered logistic models
<a href="#">xtlogit postestimation</a>	Postestimation tools for xtlogit
<a href="#">xtoprobit</a>	Random-effects ordered probit models
<a href="#">xtoprobit postestimation</a>	Postestimation tools for xtoprobit
<a href="#">xtpcse</a>	Linear regression with panel-corrected standard errors
<a href="#">xtpcse postestimation</a>	Postestimation tools for xtpcse
<a href="#">xtpoisson</a>	Fixed-effects, random-effects, and population-averaged Poisson models
<a href="#">xtpoisson postestimation</a>	Postestimation tools for xtpoisson
<a href="#">xtprobit</a>	Random-effects and population-averaged probit models
<a href="#">xtprobit postestimation</a>	Postestimation tools for xtprobit
<a href="#">xtrc</a>	Random-coefficients model
<a href="#">xtrc postestimation</a>	Postestimation tools for xtrc
<a href="#">xtreg</a>	Fixed-, between-, and random-effects and population-averaged linear models
<a href="#">xtreg postestimation</a>	Postestimation tools for xtreg
<a href="#">xtregar</a>	Fixed- and random-effects linear models with an AR(1) disturbance
<a href="#">xtregar postestimation</a>	Postestimation tools for xtregar
<a href="#">xtset</a>	Declare data to be panel data
<a href="#">xtstreg</a>	Random-effects parametric survival models
<a href="#">xtstreg postestimation</a>	Postestimation tools for xtstreg
<a href="#">xtsum</a>	Summarize xt data
<a href="#">xttab</a>	Tabulate xt data
<a href="#">xttobit</a>	Random-effects tobit models
<a href="#">xttobit postestimation</a>	Postestimation tools for xttobit
<a href="#">xtunitroot</a>	Panel-data unit-root tests
<a href="#">Glossary</a>
