frame rename — Rename existing frame

Description
frame rename changes the name of an existing frame. You can even rename the current frame.

Menu
Data > Frames Manager

Syntax
frame rename oldframename newframename

Remarks and examples
oldframename must be an existing frame. It may be the current frame. newframename must not be an existing frame.

Example 1
Let's assume we have several frames in memory, including a frame named default. We see this by typing frames dir:

. frames dir
    cars  74 x 12; 1978 Automobile Data
default  50 x 13; 1980 Census data by state
    work  28534 x 21; National Longitudinal Survey. Young Women 14-26 years of age in 1968

We want to rename the default frame to a new frame named census:

. frame rename default census

We also want to rename the existing frame cars to automobiles:

. frame rename cars automobiles

We can then check the changes with frames dir:

. frames dir
    automobiles  74 x 12; 1978 Automobile Data
census  50 x 13; 1980 Census data by state
    work  28534 x 21; National Longitudinal Survey. Young Women 14-26 years of age in 1968
