|--------------------------------------|--|
| Intro | Introduction to extended regression models manual |
| Intro 1 | An introduction to the ERM commands |
| Intro 2 | The models that ERMs fit |
| Intro 3 | Endogenous covariates features |
| Intro 4 | Endogenous sample-selection features |
| Intro 5 | Treatment assignment features |
| Intro 6 | Panel data and grouped data model features |
| Intro 7 | Model interpretation |
| Intro 8 | A Rosetta stone for extended regression commands |
| Intro 9 | Conceptual introduction via worked example |
| <code>eintreg</code> | Extended interval regression |
| <code>eintreg postestimation</code> | Postestimation tools for <code>eintreg</code> and <code>xteintreg</code> |
| <code>eintreg predict</code> | <code>predict</code> after <code>eintreg</code> and <code>xteintreg</code> |
| <code>eoprobit</code> | Extended ordered probit regression |
| <code>eoprobit postestimation</code> | Postestimation tools for <code>eoprobit</code> and <code>xteoprobit</code> |
| <code>eoprobit predict</code> | <code>predict</code> after <code>eoprobit</code> and <code>xteoprobit</code> |
| <code>eprobit</code> | Extended probit regression |
| <code>eprobit postestimation</code> | Postestimation tools for <code>eprobit</code> and <code>xteprobit</code> |
| <code>eprobit predict</code> | <code>predict</code> after <code>eprobit</code> and <code>xteprobit</code> |
| <code>eregress</code> | Extended linear regression |
| <code>eregress postestimation</code> | Postestimation tools for <code>eregress</code> and <code>xteregress</code> |
| <code>eregress predict</code> | <code>predict</code> after <code>eregress</code> and <code>xteregress</code> |
| ERM options | Extended regression model options |
| <code>estat teffects</code> | Average treatment effects for extended regression models |
| Example 1a | Linear regression with continuous endogenous covariate |
| Example 1b | Interval regression with continuous endogenous covariate |
| Example 1c | Interval regression with endogenous covariate and sample selection |
| Example 2a | Linear regression with binary endogenous covariate |
| Example 2b | Linear regression with exogenous treatment |
| Example 2c | Linear regression with endogenous treatment |
| Example 3a | Probit regression with continuous endogenous covariate |
| Example 3b | Probit regression with endogenous covariate and treatment |
| Example 4a | Probit regression with endogenous sample selection |
| Example 4b | Probit regression with endogenous treatment and sample selection |
| Example 5 | Probit regression with endogenous ordinal treatment |
| Example 6a | Ordered probit regression with endogenous treatment |
| Example 6b | Ordered probit regression with endogenous treatment and sample selection |
| Example 7 | Random-effects regression with continuous endogenous covariate |
| Example 8a | Random effects in one equation and endogenous covariate |
| Example 8b | Random effects, endogenous covariate, and endogenous sample selection |

Example 9 Ordered probit regression with endogenous treatment and random effects

predict advanced predict's advanced features

predict treatment predict for treatment statistics

Triangularize How to triangularize a system of equations
