Remarks and examples

See [G-2] **graph manipulation** for an introduction to the graph manipulation commands. See [P] **window manage** for a discussion of how Stata's windowed interface is accessed.

graph close closes Graph windows, allowing users to easily manage Stata's windowed interface. graph close can also be used to move through series of graphs. After each graph is examined, it can be closed without manually closing the Graph window. Graph is the default name of the graph.
