Description

graph query, schemes lists the available schemes.
graph query without options lists the available styles.
graph query stylename lists the styles available within stylename.

Quick start

List styles used in graph options
   graph query

List available color styles
   graph query colorstyle

List available graph schemes
   graph query, scheme

Menu

Graphics > Manage graphs > Query styles and schemes
Syntax

```
graph query, schemes

grah query

grah query stylenam
```

Remarks and examples

This manual may not be—probably is not—complete. Schemes and styles can be added by StataCorp via updates (see 
[R] update), by other users and traded over the Internet (see [R] net and [R] ssc), and by you.

Schemes define how graphs look (see [G-4] Schemes intro), and styles define the features that are available to you (see [G-4] symbolstyle or [G-4] linestyle).

To find out which schemes are installed on your computer, type

```
. graph query, schemes
```

See [G-4] Schemes intro for information on schemes and how to use them.

To find out which styles are installed on your computer, type

```
. graph query
```

Many styles will be listed. How you use those styles is described in this manual. For instance, one of the styles that will be listed is symbolstyle. See [G-4] symbolstyle for more information on symbol styles. To find out which symbol styles are available to you, type

```
. graph query symbolstyle
```

All styles end in “style”, and you may omit typing that part:

```
. graph query symbol
```
