

Description

intensitystyles specify the intensity of colors as a percentage from 0 to 100 and are used in *shadestyles*; see [G-4] *shadestyle*.

Syntax

<i>intensitystyle</i>	Description
<code>inten0</code>	0% intensity, no color at all
<code>inten10</code>	
<code>inten20</code>	
<code>...</code>	
<code>inten90</code>	100% intensity, full color
<code>inten100</code>	
<code>#</code>	<code>#%</code> intensity, 0 to 100

Other *intensitystyles* may be available; type

```
. graph query intensitystyle
```

to obtain the complete list of *intensitystyles* installed on your computer. If other *intensitystyles* do exist, they are merely words attached to numeric values.

Remarks and examples

intensitystyle is used primarily in scheme files and is rarely specified interactively, though some options, such as the `intensity()` option, may accept the style names in addition to numeric values.
