

Description

Use `mi export nhanes1` to export data in the format used by the National Health and Nutrition Examination Survey.

Use `mi export ice` to export data in the format used by `ice` (Royston 2004, 2005a, 2005b, 2007, 2009).

If and when other standards develop for recording multiple-imputation data, other `mi export` sub-commands will be added.

Syntax

```
mi export nhanes1 ...
```

```
mi export ice ...
```

See [\[MI\] `mi export nhanes1`](#) and [\[MI\] `mi export ice`](#).

Remarks and examples

If you wish to send data to other Stata users, ignore `mi export` and just send them your `mi` dataset(s).

To send data to users of other packages, however, you will have to negotiate the format you will use. The easiest way to send data to non-Stata users is probably to `mi convert` (see [\[MI\] `mi convert`](#)) your data to `flongsep` and then use `outfile` (see [\[D\] `outfile`](#)) or export delimited (see [\[D\] `import delimited`](#)). Also see [\[U\] 22 Entering and importing data](#).
