

Description

`set rmsg` determines whether the return message is to be displayed at the completion of each command. The initial setting is `off`. The return message shows how long the command took to execute and what time it completed execution.

Syntax

```
set rmsg { on | off } [ , permanently ]
```

Option

`permanently` specifies that, in addition to making the change right now, the `rmsg` setting be remembered and become the default setting when you invoke Stata.

Remarks and examples

See [\[U\] 8 Error messages and return codes](#) for a description of return messages and for use of this command.
