Description

`grmap` draws choropleth maps. Choropleth maps are maps in which shading or coloring is used to indicate values of variables within areas.

Type `help grmap` for syntax.

Quick start

A choropleth map of \( x \) using \spset\ data

```
grmap x
```

Menu

```
Statistics > Spatial autoregressive models
```

Remarks and examples

`grmap` is lightly adapted from \spmap\, which was written by Maurizio Pisati \( (2007) \) of the Università degli Studi di Milano-Bicocca and which was preceded by his \tmap\ command \( (2004) \). \grmap\ differs from \spmap\ in that it works with \spset\ data. StataCorp expresses its gratitude to Maurizio for allowing us to use it.
