**spmatrix copy** — Copy spatial weighting matrix stored in memory

### Description

*spmatrix copy* copies weighting matrices stored in memory to new names, also stored in memory.

### Quick start

Copy existing matrix \( W_d \) to \( W_{distance} \)

\[
\text{spmatrix copy } W_d \text{ } W_{distance}
\]

### Menu

Statistics > Spatial autoregressive models

### Syntax

\[
\text{spmatrix copy } spmatname_1 \text{ } spmatname_2
\]

*spmatname*_1 is the name of an existing weighting matrix.

*spmatname*_2 is a name of a weighting matrix that does not exist.
