spmatrix copy — Copy spatial weighting matrix stored in memory

Description

spmatrix copy copies weighting matrices stored in memory to new names, also stored in memory.

Quick start

Copy existing matrix \textit{Wd} to \textit{Wdistance}

\texttt{spmatrix copy Wd Wdistance}

Menu

Statistics $>$ Spatial autoregressive models

Syntax

\texttt{spmatrix copy \textit{spmatname}1 \textit{spmatname}2}

\textit{spmatname}1 is the name of an existing weighting matrix.

\textit{spmatname}2 is a name of a weighting matrix that does not exist.
