Description

This manual documents commands for survival analysis and is referred to as [ST] in cross-references. Following this entry, [ST] survival analysis provides an overview of the commands.

This manual is arranged alphabetically. If you are new to Stata’s survival analysis, we recommend that you read the following sections first:

- [ST] survival analysis  Introduction to survival analysis
- [ST] st  Survival-time data
- [ST] stset  Set variables for survival data

Stata is continually being updated, and Stata users are always writing new commands. To find out about the latest survival analysis features, type search survival after installing the latest official updates; see [R] update.
