Description

This manual documents commands for the analysis of treatment effects and is referred to as [TE] in cross-references.

After this entry, [TE] Treatment effects provides an overview of the treatment-effects estimation commands. The other parts of this manual are arranged alphabetically. If you are new to Stata’s treatment-effects commands, we recommend that you read the following sections first:

- [TE] teffects intro
- [TE] teffects intro advanced
- [TE] teffects multivalued

If you are interested in survival analysis, we also recommend that you read the following section first:

- [TE] stteffects intro

Stata is continually being updated, and Stata users are always writing new commands. To find out about the latest treatment-effects features, type search treatment effects.
