Description

This manual documents the xt commands and is referred to as [XT] in cross-references.

Following this entry, [XT] xt provides an overview of the xt commands. The other parts of this manual are arranged alphabetically. If you are new to Stata’s xt commands, we recommend that you read the following sections first:

[XT] xt Introduction to xt commands
[XT] xtset Declare a dataset to be panel data
[XT] xtreg Fixed-, between-, and random-effects, and population-averaged linear models

Stata is continually being updated, and Stata users are always writing new commands. To find out about the latest cross-sectional time-series features, type search panel data after installing the latest official updates; see [R] update.
