Statistical breadth and depth
You want a statistical package that does everything you need and also addresses the expanding range of statistical methods. Research professionals from all disciplines use Stata to manage and analyze their data—and so can you. Whether you are a student or a seasoned research professional, Stata gives you all the tools you need.

Easy to learn ...
With Stata’s menus and dialogs, you get the best of both worlds. You can easily point and click or drag and drop your way to all of Stata’s statistical, graphical, and data wrangling features. Use Stata’s intuitive command syntax to quickly execute commands. You can even access the dialog boxes for each command directly from the online help system, which is a great way to explore all of Stata’s capabilities.

Fully programmable ...
Stata has complete command-line scripting and programming facilities, including a full matrix programming language. You can easily script your analysis or even create new Stata commands that work just like those shipped with Stata. Stata’s Do-file Editor allows you to create files of Stata commands, so analyses can be reproduced with the click of a button. With Stata’s version control, your scripts will continue to work seamlessly when you upgrade to a new version.

Whether you enter commands directly or use the menus and dialogs, you can create a log of all actions and their results to ensure the reproducibility and integrity of your analyses.

And extensible
Easily search, add, and use any of the thousands of community-contributed commands with just a few mouse clicks.
